Education

Illinois State University August 2024
B.S. Business Information Systems, Minor in Data Analytics

Skills and Certifications

Certifications: AWS Certified AI Practitioner, AWS Certified Cloud Practitioner, Certified Scrum Master, Certified Scrum Product Owner
Languages: Python, VB.Net, SQL, HTML, CSS, ASP.NET
Tools: PowerBI, Git/Github, SPSS, Tableau, AutoCAD, Powershell, Unix Shell, Cherwell Service Management, Microsoft InTune, Active Directory, Confluence, VS Code, VMWare

Experience

Artificial Intelligence Intern | *Illinois State University DeepLearners* Sep. 2023 - Jul. 2024

- Led a team to develop an Automatic Speech Recognition (ASR) for a speech-to-text application at Illinois State University, enhancing lecture transcriptions and meeting summaries.
- Developed a web application using HTML, CSS and JavaScript that enables data transmission to a local SQL database, supporting the AI model's backend infrastructure.
- Deployed and fine-tuned a specialized Large Language Model to summarize textual content from meetings and lectures, employing cutting-edge NLP techniques to distill critical information from varied audio data sources.
- Configured and deployed a distributed computing setup using Dask in a Linux environment to enhance the performance of the speech-to-text AI model, enabling efficient processing of large audio datasets.

Secretary of Information Technology | *Student Government Association* Aug. 2023 - May. 2024

- Developed and maintained the Student Government Association website utilizing HTML and Omni CMS for efficient design and functionality.
- Led the implementation and configuration of Slack, optimizing student government communication channels, automating task assignments, and enhancing event planning workflows through integration with calendars and project management tools.
- Managed and resolved complex IT inquiries and issues, showcasing expertise in advanced technical troubleshooting.
- Collaborated with IT teams to diagnose and resolve critical technical challenges, substantially enhancing the underlying technological infrastructure.

Student Executive Support | *Endpoint Support* Feb. 2023 - Aug. 2024

- Promoted to a senior role, providing comprehensive system administration and IT support to ISU executives to enhance productivity and information security.
- Wrote PowerShell scripts for automating system management and improving operational efficiency.
- Efficiently managed user accounts, permissions, and access controls within Active Directory using PowerShell scripts for streamlined onboarding and offboarding processes.

Student Technology Support | *Endpoint Support* Mar. 2022 - Feb. 2023

- Leveraged the Cherwell Service Management platform to efficiently prioritize, troubleshoot, and resolve IT service requests, ensuring timely ticket resolution and thorough documentation for future reference.
- Automated and optimized asset tracking for over 3,000 laptops and IT equipment using tools like Excel, Power BI, and SQL, ensuring accurate inventory control, lifecycle management, and real-time reporting.
- Led a project to deploy 600 loaner laptops to ISU students, using Microsoft Intune for cloud-based setup and management while developing and maintaining standard operating procedures.
- Delivered IT Service Management training to new hires, covering best practices, system navigation, troubleshooting, and security protocols to enhance service quality and team skill set.
